 <https://www.linkedin.com/in/ajay-thadi>

## Career Objective

---

Front-end developer skilled in HTML, CSS, JavaScript, and Python, with hands-on experience building responsive and user-centric web applications. Strong in DOM manipulation, debugging, and UI/UX design. Seeking an entry-level role to develop scalable solutions and contribute to innovative projects.

## Education

---

**Class 12 (Science Stream)**, APSWRJC - Dr. B. R. Ambedkar Gurukullam Boys, Ramakuppam    2023 - 2025  
83%    Chittoor

**SSC – Secondary School Certificate**, Sri Saraswathi Bai Municipal High School    2023  
77.7%    Chittoor

## Internship / Training

---

**Academy for Careers in Technology-By Freshworks**    08/2025 - Current

Responsibilities / Learning:

- Front-End Development/ Back-End Development/ Full Stack Web Development

## Skills

---

- Front-End: HTML, CSS, Bootstrap
- Programming Language: JavaScript, Python
- Database: SQL
- Tools: VS Code
- Problem Solving

## Projects / Practical Work

---

**Paws Rescue and Rehabilitation Program** (<https://ajay-11012.github.io/Paws-Rescue-and-rehabilitation-Program/>)

- Developed a digital platform for reporting injured or distressed animals with location details and images, directly connecting users to NGOs for quick rescue and rehabilitation. Improved response time, coordination, and transparency through real-time tracking and updates.

**Technologies :**    HTML, CSS, JavaScript

**Tools :**    VS Code, MySQL Workbench

**Portfolio** (<https://ajay-11012.github.io/Portfolio1/>)

- Developed a responsive portfolio website using HTML, CSS, and JavaScript, with support from Generative AI tools to enhance design and content creation. The AI helped generate UI ideas, improve code quality, and speed up development. The website showcases my skills, projects, and contact information in a user-friendly and visually appealing format, demonstrating my ability to integrate AI with modern web development.

**Technologies:**    HTML, CSS, JavaScript

**Tools :**    VS Code

**Mini Project: Flames Game** (<https://play-flames-game.netlify.app/>)

- Developed a FLAMES Relationship Predictor that determines relationships based on names using string manipulation and logical algorithms. Demonstrates core programming concepts through an interactive and engaging mini project.

**Technologies:**    *HTML, CSS, JavaScript*  
**Tools :**        *VS Code*

**Certifications**
